

CONSTRUCTION, EXPORT PACK AND DEMOLITION SERVICES

Construction

Mainteck’s site construction service handles projects ranging from small, short duration capital works to large scale integrated supply, manufacture and install projects. We have the experience and flexibility to handle complex site construction requirements and offer specialist expertise in pipe work, specialist welding and site shut down work.

Dismantle & Export Pack and Demolition

Mainteck are experienced in cleaning, match marking, cataloguing and carefully dismantling and packing equipment for transport locally and overseas.

Mainteck is also licenced to offer demolition services at an unrestricted level and has successfully and safely completed several large demolition projects. Our specialists work to detailed management and control plans to ensure compliance with regulatory requirements and our own high safety standards.

CONSORTIUM OF LOCAL COMPANIES

Consortium partners

Through our consortium approach to large projects, Mainteck and it’s consortium partners have the ability to provide 500 full time, industry trained and accredited personnel for deployment to large maintenance and capital projects. Mainteck specialises in brownfield sites and the supply of a fully integrated project management team to support your needs.

Local companies, national ability

Mainteck has the ability to place a fully autonomous projects team on your site regardless of the location. Skills base comprises fabrication, fitting, electrical, instrumentation, height access and hydraulics. Our logistics and rostering systems allow us to efficiently service projects remotely.

SUPPLY CHAIN MANAGEMENT

Supply and In house Fabrication

Mainteck are able to manage all supply chain requirements from medium to large scale projects, including the initiation and procurement of all fabricating solutions for our clients.

These include not only utilisation of local and overseas quality assured suppliers, but with access to our 2500sqm Illawarra facility, we can undertake specialist fabrication requirements locally and in house.

Our quality accreditation ensures a high level of quality in not only the systems used, but also in the production and workmanship of structural and mechanical fabricated items.

SAFETY AND QUALITY SYSTEMS

Behaviourally Based

Workplace safety is fundamental to Mainteck’s operations from senior management through all levels of the organisation. The commitment of all employees helps us comply with AS4801:2001.

Quality

Mainteck’s quality system, implemented at Head Office and incorporated across all our projects – local and remote, fully complies with and is certified by SAI Global to AS/NZ ISO9001:2008 “Quality Systems - Model for Quality Assurance in Production, Installation and Servicing”.
